

# Apps4.Pro Planner Manager security document

## About the app

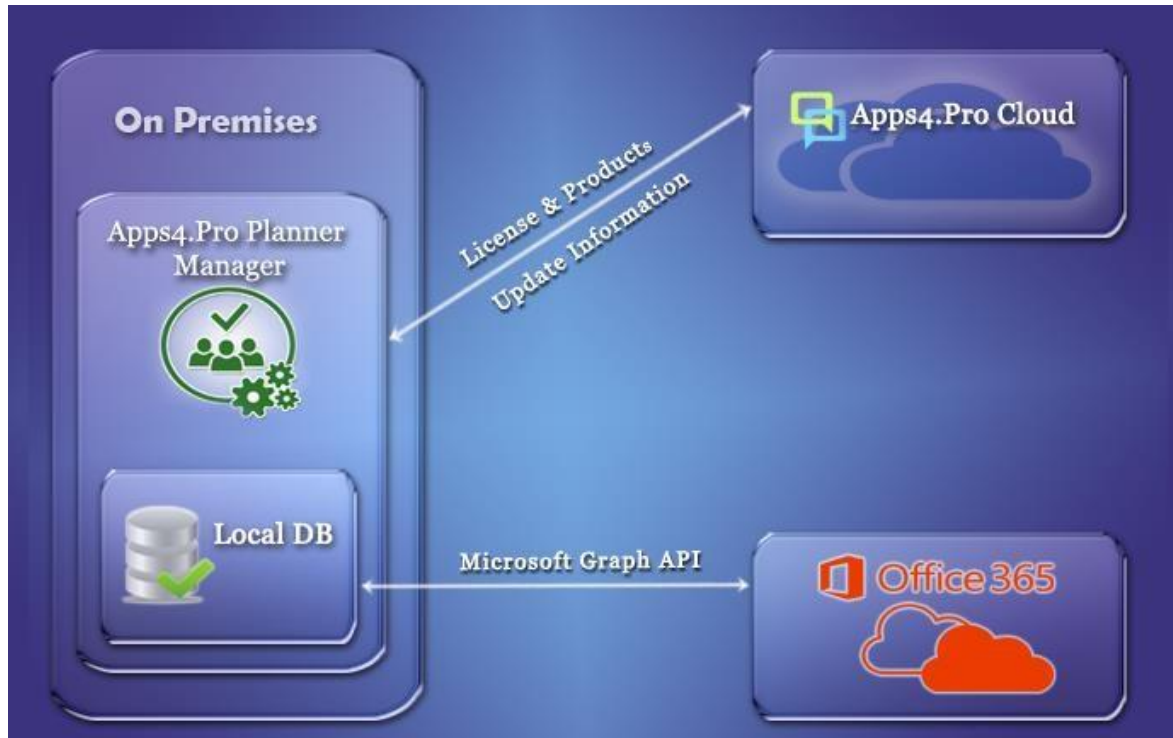

Apps4.Pro Planner Manager is a On Premise desktop application that can be installed and used on any Windows operating systems. This app offers excellent features for Microsoft Planner and saves time for managers and help users to work more effectively and planned. Managers can review their plan performance using various build in reports and adjust wherever necessary using Gantt Chart to get the things done at right time by right person.

## About the company

JiJi Technologies Private Limited is the brain behind the brand Apps4.Pro Planner. JiJi Technologies is the Microsoft Gold Certified Application Development Partner for more than 5 years and have been in industry since year 2007. Click on the below link to know more.

## Architecture Diagram

### How it is built?

This app is built using Microsoft Graph APIs to perform actions in Planner. During the installation, the app will create a local database on the computer in which it was installed, and all the required Planner data will be stored in this DB. Hence the communication between your tenant and Microsoft Planner direct. We will not store any information on our servers except your Office 365 login email address for license validation purposes. And your Office 365 login email address is not shared with anyone.

Please contact us on [support@jijitechnologies.com](mailto:support@jijitechnologies.com) if you have any specific questions and we are happy to help you.
