

Apps4.Pro Planner Gantt security document

About the app

Apps4.Pro Planner Gantt is a Chrome / Edge extension that can be installed from chrome / edge store and it can be used from any operating systems. This app helps you to visualize tasks in sequence and plan project tasks easily. It connects with Microsoft Planner and allows you to

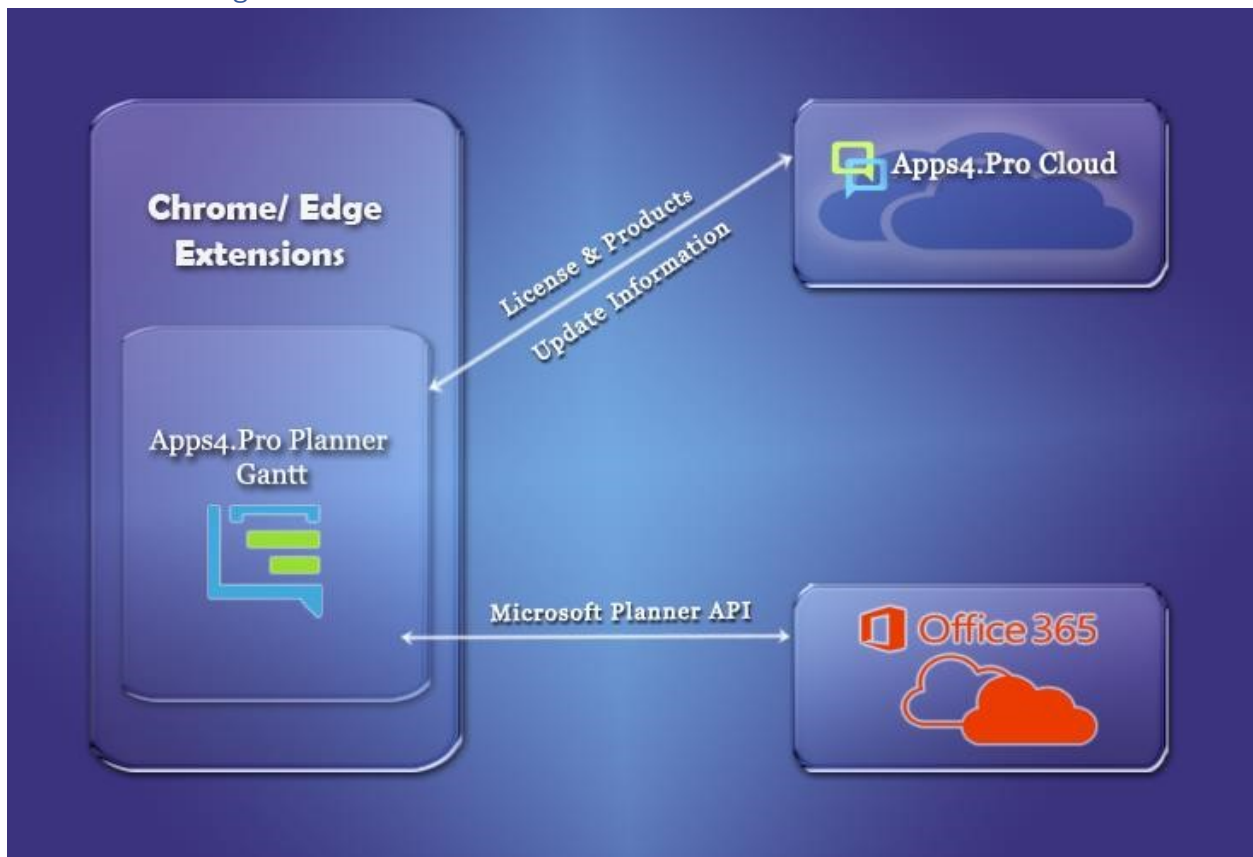

- View Planner tasks in Gantt
- Set task dependency
- Create Sub tasks by drag and drop
- Set Actual start / end dates and compare it with baseline dates
- Set contribution units for task assignments

About the company

Architecture Diagram

How it is built?

This extension is built using Microsoft Planner APIs to perform actions in Planner. The user can use this extension by sign in into the planner. Hence the communication between your tenant and Microsoft Planner direct. We will not store any information on our servers except your Office 365 login email address for license validation purposes and product update information.

Please contact us on support@jjitechnologies.com if you have any specific questions and we are happy to help you.
