Architecture Diagram

How it built?

      This extension is built using Microsoft Graph APIs to perform actions in Microsoft Planner and Power BI rest APIs to perform actions in Microsoft Power BI. The user can use this extension by adding corresponding Planner and Power BI account. Hence the communication between your tenant and Microsoft Planner as well as Power BI is direct. We will not store any information on our servers expect your Office 365 login email address for license validation purpose and product update information.
